

## CONTRACT DESIGN & DEVELOPMENT SERVICES

### TAILORED SOLUTIONS TO GET YOUR PRODUCT TO MARKET FASTER

Our experts provide tailored solutions to meet your unique needs, for one step in your process or an entire product lifecycle. With expertise in components, assemblies, design, development, pilot production, and high-volume manufacturing, we can expand your team's capacity, solve complex challenges, and identify innovative solutions to help you bring successful products to market faster.

---

## YOUR PARTNER IN BRINGING BETTER MEDICAL DEVICES TO MARKET.

Heraeus Medevio acts as a flexible, tailored, end-to-end extension of your engineering and product development teams. With expertise from materials, development, and pilot production to high volume manufacturing including unmatched clinical and technical expertise, Heraeus device experts will also help you efficiently manage global regulatory and submission requirements.

### PRODUCT DESIGN & DEVELOPMENT

Global collaboration hubs committed to design and development with dedicated pilot production lines that can be mirrored in production

### MANUFACTURING EXPERTISE

Proven manufacturing technology excellence and superior engineering know-how to solve complex challenges

### COMMITTED TO QUALITY

170-year history in materials science and trusted quality

### SUPPLY CHAIN OPTIMIZATION

Vertically integrated from concept to completion to simplify your supply chain

### CONCEPT & FEASIBILITY

Our end-to-end process begins with understanding your needs and desired outputs. From there, our experts design your project and begin rapid prototyping. As quality is at the center of everything we do, the prototype goes through both benchtop and functionality testing.

### DEVELOPMENT, TESTING, & VALIDATION

Our team generates controlled design documents, verifies the product meets design intent, and validates processes to ensure robust manufacturing processes that are stable, repeatable, and measurable.

### REGULATORY CLEARANCE

We understand getting through regulatory approval can be stressful, which is why we developed internal expertise to support you throughout the process. Together, we can facilitate getting to market quickly and efficiently with three options:

- Heraeus Legal Manufacturer
- Heraeus Legal Manufacturer & Transfer Regulatory to Customer
- Heraeus Contract Manufacturer

### COMMERCIALIZATION

Our global facilities produce over one million products daily, offering you an experienced partner in large-scale and efficient manufacturing transfers. Our team is here to support you through ramp up, long-term manufacturing and end of life.

### MARKET READY PRODUCTS

Get to market faster with our selection of market ready, regulatory-approved guidewires and catheter platforms.

### QUALITY SYSTEMS

Reduce your development and regulatory timelines with our full range of in-house product performance testing to support the design and development process and compilation of testing required to secure regulatory clearances and approvals. Each of our global sites carry its own ISO Certifications and four are FDA registered.

---

Through a mix of inorganic and organic activities, what started as a components manufacturer for cardiac rhythm management has grown into component, assembly, and other support in:

- NEUROMODULATION
- ELECTROPHYSIOLOGY
- NEUROVASCULAR
- PERIPHERAL VASCULAR
- VASCULAR ACCESS
- CARDIAC RHYTHM MANAGEMENT
- STRUCTURAL HEART
